OBJECTIVE

Information Technology undergraduate (Expected 2026) with hands-on experience in backend development, database-driven systems, and application troubleshooting. Experienced in building and supporting web-based systems using PHP, Node.js, MySQL, and related technologies. Strong problem-solving and debugging skills with ability to analyze system issues, support backend integrations, and collaborate with development teams. Seeking an entry-level IT role in application support or software engineering.

SKILLS

- **Programming Languages:** Java, C#, Kotlin, JavaScript, PHP
- **Backend & Web:** Node.js, PHP
- **Databases:** MySQL, PostgreSQL(Basic), MongoDB (Basic), Redis (Basic)
- **Tools:** GitHub, VS Code, Android Studio, Figma, XAMPP
- **Concepts:** OOP, CRUD operations, system debugging, application troubleshooting, inventory & POS systems

EDUCATION

Bachelor of Science in Information Technology

STI College Sta Mesa | 2022-Present

Senior High School – TVL (Technical Drafting)

Mariano Marcos Memorial High School | Graduated: June 2022

Junior High School

Mariano Marcos Memorial High School | Graduated: March 2020

PROJECTS

Tinda Go v2.0 E-grocery Platform

Back-end | June - Currently developing

- Developing an e-grocery backend managing customer experience, catalogs, and logistics queueing.
- Building a centralized Node.js/GraphQL API serving customer, admin, and rider clients.
- Implementing a multiple database architecture utilizing PostgreSQL, MongoDB, and Redis.
- Processing asynchronous fulfillment and dispatch events using AWS SQS workers.

POS and Inventory using Data Analytics

Capstone 1 and 2 | Front-end / Back-end 2025

- Developed a POS and inventory system for a local pastry business to streamline daily transactions and stock monitoring
- Implemented backend logic and database integration using MySQL
- Integrated data analytics features to track sales trends and inventory turnover
- Automated manual recording processes, reducing human error and improving operational efficiency

Web Developer Intern Project – WeSupport Incorporated

OJT/Internship - Back-end February 2026 – May 2026

- Developed backend functionalities for an Inventory and Email Management System using PHP and MySQL.
- Designed and maintained database structures, entities, and relationships to support inventory and asset management.
- Troubleshot and resolved database, data retrieval, and frontend-backend integration issues, improving system reliability.
